Application Features

User-Centric Design	Easy Everyday Use
CENTRALIZED NAVIGATION Navigate directly on the app, filter to buildings and assets, or go directly to a critical alert.	**SCHEDULES** Run equipment on schedules - set for individual equipment, groups, or across buildings. Make changes with one click.
EQUIPMENT DETAILS Access equipment data without a site visit so you can verify hot/cold issues, validate repairs, or troubleshoot issues	**NOTIFICATIONS** Get important equipment diagnostics or warnings delivered via email or text so you can quickly act
DATA MANAGEMENT Access malfunction codes, system faults, and point data. Data is "tagged" for easy charting and analysis	**CENTRALIZED NAVIGATION** Control and monitor sites remotely at the touch of a button, assuring your customers and employees are comfortable.
	USER MANAGEMENT Role-based permission and authentication allow different levels of access for different users.
Safety, Quality, and Compliance	**Proactive Building Management**
ANALYTICS AND KPIS Develop customized dashboards to analyze the data that you care about most	**TROUBLESHOOTING TOOLS** Ongoing diagnostics running across your equipment data sniffing out problems before they get bigger
REPORTS Generate dashboards and reports via the tool builder in the application to generate digital audits	**SERVICE REQUESTS** The smart service call: Address issues faster by requesting service directly from the app. Linked to your service provider.
GRAPHICS Generate graphics that make technical reports easy to understand for all relevant audiences	

TURNTIDE TECHNOLOGY FOR SUSTAINABLE OPERATIONS

Our breakthrough technologies accelerate electrification and sustainable operations for energy-intensive industries.
